

**Consults seen by one NIH ID fellow during a one-month rotation at
Georgetown University Hospital in 2007-08**

Wound infection/osteomyelitis with prosthesis - ESRD
MRSA facial cellulitis - diabetes
Persistent coagulase-negative staphylococcal bacteremia - breast cancer with mediport
Mycobacterial bacteremia - advanced HIV/AIDS
Pneumonia and weight loss - advanced HIV/AIDS
Pseudomonas/E.coli/Staph aureus UTI - nephrostomy tubes
Staphylococcus hominis bacteremia
Need for PCP prophylaxis? - lupus on chronic steroids
GNR bacteremia and fatigue for six weeks in returning traveler
Acute cholecystitis - carcinoid tumor
Staphylococcus haemolyticus bacteremia
MRSA facial cellulitis - diabetes/steroids
Fever (*Enterococcus/Candida*) - obstructive jaundice
Fusobacterium bacteremia - liver transplant recipient
Multilobar pneumonia – renal transplant recipient
Small bowel perforation and sepsis - metastatic breast cancer
headache/photophobia - small bowel transplant recipient
MSSA multilobar pneumonia
Pneumonia - lung cancer
Fungal peritonitis – peritoneal dialysis
CMV colitis - small bowel transplantation
Neutropenic fever - CLL
Cavitary pulmonary lesion - HIV
MSSA bacteremia - diabetes
Gram-negative bacteremia - pancreatic cancer
Postoperative inguinal wound infection/cellulitis - penile cancer
Leukocytosis/diarrhea - AML
Aspiration pneumonia - renal transplant recipient
Mycobacterium abscessus lung infection
Gram-negative bacteremia - small bowel transplant recipient
Neutropenic fever - AML
Cellulitis s/p total knee replacement
MDR *E. coli/Pseudomonas* UTI - diabetes
ESBL *E. coli* bacteremia - gallbladder carcinoma
Fever of unknown origin - liver transplant recipient
Persistent *Klebsiella* bacteremia - PICC line
Bronchiectasis and multilobar pneumonia – advanced HIV/AIDS
Community-acquired pneumonia following viral syndrome
Fever - AML

Bowel perforation and sepsis - Avastin chemotherapy

Altered mental status/tremor - high tacrolimus level

Ground glass pulmonary infiltrates - CML in blast crisis
